

Mammal  
food

bingo

You may not be able to spot all these mammals in your local area, but you can try finding the different types of food they eat.

**Common shrew** – Very small with a long, pointed nose. Often difficult to spot because it lives in dense vegetation. Loves slugs, snails, grubs and worms.

● Seen

**Hare** – Its powerful hind legs mean it can sprint at up to 45mph. Grazes on the young shoots of grasses and herbs.

● Seen

**Horseshoe bat** – Distinguished by a broad, u-shaped piece of skin around the nostrils. It eats flying insects, mainly caught mid-air.

● Seen

**Otter** – Its webbed feet, with five digits on each foot, leave distinctive footprints. Otters live in holts and eat eels, crayfish, other fish, birds and small mammals.

● Seen

**Pine marten** – Feeds on birds, squirrels, rabbits, eggs, beetles, berries and honey. Also loves peanut butter! Lives mainly in Scotland, with some presence in England and Wales.

● Seen

**Red squirrel** – Increasingly rare, the red squirrel enjoys seeds, nuts, shoots, fungi and even insects. It lives in a tree-top drey.
