

# The Master Mask : Instructions

(Remember to ask a parent or guardian permission when using the scissors)

## The cut-out

- Use scissors to cut around the Masters head, following the dotted lines as closely as possible.

## Making the eye holes

- Fold the paper gently in line with the eyes and cut out semi circles by following the dotted lines.

## Securing the Mask

- Place a piece of adhesive putty underneath the ear holes and stick a pencil all the way through.
- Now, thread a piece of string or elastic band through each of the ear holes, from the back to the front. (Remember to use enough to fit around you head) and tie a small knot at each end.

There you go, your very own Master Mask!!
