

## Technical specifications

You can watch the videos which go with the materials in the Learning Circle pack directly from this DVD. If you want to, you can also download the materials from this DVD as interactive PDF files. The videos are embedded in the PDFs and will play if you click on the appropriate part of the document.

**In order for the PDFs to work properly, you need to make sure your computer has the following:**

- Sound card and video card installed.
- 

- The latest version of Adobe Reader downloaded and installed on your computer from here: <http://get.adobe.com/uk/reader/> If you are using an Apple computer the PDF will automatically open in a programme called "Preview". This programme will NOT play the embedded films – you must also use Adobe Reader.
- 

- You will need to have Adobe Flash Player installed on your computer from here: <http://get.adobe.com/flashplayer/>
