Harry

And the expression we are going to look at in this programme is 'mind-blowing', or, 'to blow your mind'.

Feifei

To blow your mind! We'll look at what it means and when you can use it. So anyway, Harry, I've heard you really like travelling.

Harry

Me? Yeah, I love travelling, to be free. Yeah, I've travelled.

Feifei

Where have you been?

Harry

All over: Europe, South East Asia, North Africa, Central America.

Feifei

So, which was the best trip?

Harry

Hard to say, they were all great in their own way, but I think my trip to Cambodia really stands out.

Feifei

Why's that?

Harry

Well, it's got scenery, beaches, nice food and all that stuff, but the temples at Angkor Wat – well, they just blew my mind.

Feifei

They blew your mind?!

Harry

Yeah, it's an amazing place. It's got incredible statues, roads, waterways all abandoned in the forest. Truly mind-blowing.

Feifei

But what does it mean – mind blowing; it blew your mind?

Harry

Oh right. Well, when something is so incredible, so surprising that we stop and wonder about how amazing it is, we can say it's mind-blowing, or that it blew our minds, as though our brains have broken down because they are so overwhelmed.

Feifei

I see. So what else can be mind-blowing?

Harry

Anything amazing: a painting, a film, a story.

Feifei

And what about nature – the ocean, the planets, the insect world?

Harry

Yes, the unexplored ocean depths, the size of the other planets, the huge number and variety of insects - those things are all totally mind-blowing if you stop and think about them.

Tejali

तर हॅरीला वाटतं की कंबोडियातल्या अंकोरवाट मधली मंदिरे 'mind-blowing' आहेत, they 'blew his mind'. Mind म्हणजे मन. Blow चा अर्थ आहे उडून जाणे किंवा फुंकर घालणे, पण इथे अर्थ वेगळा घेतलाय. आपण काहीतरी आपण काहीतरी अत्यंत विस्मयकारक पाहतो किंवा अनुभवतो, त्यामुळे आपण अत्यंत भारावून जातो, आपलं मन अगदी थरारून जात, आपण अगदी चकित होऊन जातो अशा वेळी म्हणतात, mind-blowing.

ही आहेत काही उदाहरणे.

Examples

The latest tablet computer has an incredible camera and loads of other mind-blowing features.

The battle scenes in the new film were amazing. I couldn't believe the realistic graphics. They just blew my mind.

One of the most mind-blowing things about the universe is the distance between the planets in our solar system.

Harry

So, to finish off, I thought I'd give you a mind-blowing fact about space and the universe - Something that will really blow your mind.

Feifei

OK, let's hear it.

Harry

Did you know that every hour, the universe expands by a billion miles in all directions?

Feifei

It gets bigger by one billion miles in all directions?! That is mind-blowing.

Harry

I know - just mind-blowing.

Feifei

I've got a very different one for you about insects – cockroaches.

Harry

Cockroaches? Yuck! What is it?

Feifei

Well, cockroaches can live for several weeks without their heads.

Harry

They can live without their heads?! Well, that's just blown my mind.

Tejali
