

This is not a word-for-word transcript

Tejali

नमस्कार मित्रांनो! Hello and welcome to English Together, असा शो जिथे आपण चर्चा करतो निरनिराळे विषय आणि त्यासंबंधित शब्दांची. मी तेजाली आणि आज माझ्याबरोबर आहे सॅम आणि टॉम.

Sam

Hi, I'm Sam.

Tom

And I'm Tom. Hi everybody, thanks for joining us again!

Sam

Do you want to know something interesting, Tom?

Tom

Ok...but I don't usually love your 'interesting facts', Sam!

Sam

Well, you're probably not going to like this one, either, because...I'm going to live longer than you.

Tom

You're going to live longer than me?! How do you know?

Tejali

She knows, Tom, because it's a fact – women live longer than men. जागतिक आरोग्य संघटना म्हणजे World Health Organisation (WHO)च्या म्हणण्याप्रमाणे साल २००० ते २०१६ मध्ये जगभरात लोकांचं आयुर्मान साडेपाच वर्षांनी वाढलं आहे. पण तरीही पुरुषांपेक्षा महिलांचं आयुर्मान जास्त आहे. हे किती जास्त आहे माहितीये? तीन ऑप्शन्स आहेत. दोन वर्ष, चार वर्ष की सहा वर्ष?

Tom

Oh, so it's not that big a gap! 6 years isn't so bad!

Tejali

We'll tell you the answer later. आत्ता आपण न्यूकॅसल युनिव्हर्सिटीच्या प्रोफेसर कॅरोल जॅंगर यांच्या मुलाखतीचा एक भाग ऐकू, त्यावरून आपल्याला प्रश्नांचं उत्तर मिळायला मदत होईल.

News insert

Men seem to be less health-seeking and when they're ill, they will tend to go to the GP less often than women, and they will adhere less to treatment than women do. Women seem to be programmed to live longer to care for the next generation and there's some evidence that that carries on even further into grand-parenting, as well. Though I'm not saying that men are disposable, but women are needed to look after and bring up the next generation.

Sam

So, basically, men are worse at looking after themselves than women. They go to the doctor's less, and adhere less to the treatment the doctor gives.

Tejali

'To adhere to treatment' म्हणजे दिलेल्या उपाचारांचं योग्य रीतीने पालन करणे, दिलेले उपचार नीट घेणे . So it seems that men don't listen to what the doctors tell them.

Tom

Well, that's not true! I always adhere to what the doctor says. After all, they are the experts. In fact, I'm definitely health-seeking, as well!

Tejali

'To be health-seeking' म्हणजे आपल्या आरोग्याची नीट काळजी घेणारे. Tom, does that mean you go to the doctor's often?

Tom

Well, not often, but if I need to go, I will. Everybody in my family is health-seeking. We're not professional medics, so we listen to what they say!

Sam

Well, that's very good, Tom, but you're in the minority. Men are more likely to die of cancer and heart disease than women, and men drink, smoke and take more drugs than women.

Tom

Hang on, that's not entirely fair. There are also other factors that contribute to men dying younger, too. We tend to do riskier jobs and tend to do more dangerous activities, for example.

Tejali

That's true. Many risky, labor intensive jobs still have male dominance, like construction labour, mining labors, may be shop floor labors in heavy industry. 'To tend to do something' म्हणजे एखाद्या गोष्टीकडे कल असणे.

Sam

Ok... but some of that is also your choice. Men tend to be attracted to risk, and women tend to focus on looking after their families. So we *have to* live longer or what would happen to the future of the human race?!

Tejali

मला वाटतं हीच वेळ योग्य आहे माझ्या प्रश्नाचं उत्तर द्यायची. मी विचारलेलं स्त्री आणि पुरुषांच्या आयुर्मानातला फरक किती आहे? ऑप्शन्स होते साधारण दोन वर्ष, साधारण चार वर्ष की साधारण सहा वर्ष? आणि याचं बरोबर उत्तर आहे 4.4 वर्ष, म्हणजे जवळपास चार वर्ष. +++++

Tom

Ha, 4 years? That's nothing! Sam, are you saying that women are responsible for the future of the human race all on their own and that men are disposable?

Tejali

'To be disposable' म्हणजे वापरून झाल्यावर टाकून देण्याजोगे. Yes, what are you saying, Sam?

Sam

Of course not! I don't think you're disposable at all! How would I do this programme without you?

Tom

Well, if your facts are correct, you'll have to one day! In fact, you'll have to do it for 4 years.

Sam

My facts??

Tom

Yep, your fact, Sam. You'll have to ask Sian to help you when I'm gone.

Tejali

Who would argue with you then, Sam?

तुम्हाला याबाबत काय वाटतंय? ? पुरुष आरोग्याची योग्य काळजी घेत नाहीत, they 'tend to be less health-seeking' than woman असं वाटतं का तुम्हाला? पण तुम्ही आरोग्याची काळजी घेता का? And Do you 'adhere to treatment' the doctor subscribe? आज इथेच थांबूया पण आजचा कार्यक्रम संपवण्याआधी आजचे शब्द बघू. 'To adhere to treatment' म्हणजे दिलेले उपचार नीट घेणे, 'to be health-seeking' म्हणजे आपल्या आरोग्याची नीट काळजी घेणे, 'to tend to do something' म्हणजे एखादी गोष्ट करण्याकडे कल असणे, आणि 'to be disposable' म्हणजे वापरून झाल्यावर टाकून देता येण्याजोगे'. आमच्या आजच्या भागाबद्दल तुम्हाला काय वाटलं ते आमच्या फेसबुक ग्रुप वर सांगा पुन्हा भेटू पुढच्या भागात. Bye.
