

# The Ood Mask : Instructions

(Remember to ask a parent or guardian for permission when using scissors)

## The cut-out

- Use scissors to cut around the Ood's face and tentacles, following the dotted lines as closely as possible.

## Making the eye holes

- Fold the paper gently in line with the eyes and cut out semi circles by following the dotted lines.

## Attaching the tentacles

- Place the tentacles behind the Ood's face, align the matching upper parts and attach securely with sticky tape.

## Securing the Mask

- Place a piece of adhesive putty just inside the ear holes and stick a pencil all the way through.
- Now, thread a piece of string or elastic band through each of the holes, from the back to the front, and tie a small knot at each end (remember to use enough to fit around your head).

There you go, your very own Ood Mask!
