

The Smiler Mask : Instructions

(Remember to ask a parent or guardian permission when using the scissors)

The cut-out

- Use scissors to cut around the Smiler's face, following the dotted lines as closely as possible.

Making the eye holes

- Fold the paper gently in line with the eyes and cut out semi circles by following the dotted lines.

Securing the Mask

- Place a piece of adhesive putty underneath the ear holes and stick a pencil all the way through.
- Now, thread a piece of string or elastic band through each of the ear holes, from the back to the front. (Remember to use enough to fit around you head) and tie a small knot at each end.

There you go, your very own Smiler Mask!!
