# ZOMBIE ALICE MASK

## The cut-out

- Use scissors to cut around Alice's head; follow the dotted lines as closely as possible.

## Making the eye holes

- Fold the paper gently in line with the eyes and cut out semicircles by following the white circles.

## Securing the Mask

### *Method 1: Elastic*

- Place a piece of adhesive putty underneath the ear holes and stick a pencil all the way through.
- Now, thread a piece of string or elastic through each of the ear holes, from the back to the front (remember to use enough to fit around your head) and tie a small knot at each end.

### *Method 2: Stick*

- Alternatively, place a wooden stick onto the back of the mask, so that half of it protrudes out from the bottom of the mask.
- Fasten the stick in place with adhesive tape.
- You can now hold the mask in front of your face by the stick.

There you go, your very own Zombie Alice Mask.

Happy Halloween!
